

Technical Analysis & Swing Trading

Complete Manual of Technical Analysis & Price Action

Price Action, Dynamic Support & Resistance, Volume Profiling & Asymmetrical Setups

Nivel / Level	Páginas / Pages	Autor / Author	Editorial
Level: Intermediate	260 páginas	ManualesdeBolsa.com Technical Desk	ManualesdeBolsa

Executive Summary & Learning Objectives

A practical visual manual designed to decode market dynamics and track institutional footprints across price charts. By analyzing market regimes, raw price action, Japanese candlestick formations, and real trading volume, investors develop the skill to execute high-probability setups with favorable risk-to-reward asymmetry.

Core Handbook Takeaway:

"Price discounts all public information. Technical analysis is not a crystal ball for forecasting; it is an objective mathematical framework for managing risk and trading strictly when the potential payout heavily outweighs the downside."

Complete Handbook Curriculum

1. Dow Theory Principles: The Three Market Trends, Accumulation & Distribution Phases
2. High-Probability Japanese Candlestick Patterns: Hammers, Bullish Engulfing, Dojis & Morning Stars
3. Market Structure: Key Support and Resistance Levels, Trendlines & Dynamic Channels
4. Deciphering Volume: Wyckoff Methodology, Liquidity Pools & Effort vs. Result Laws
5. Core Technical Indicators: Exponential Moving Averages (EMA 20, 50, 200), RSI & MACD
6. Execution Strategies: High-Probability Breakouts and Pullback Confirmations at Value Zones

Disciplined Investor Checklist

- ✓ Always audit the broader trend on the higher timeframe (Weekly or Daily chart) prior to placing trades.
- ✓ Wait for the official bar/candle close to confirm the legitimacy of structural breakouts or reversal signals.
- ✓ Avoid initiating long positions when price is trading with a downward slope below the 200-day moving average.
- ✓ Require volume expansion on breakouts to filter out false traps engineered by institutional liquidity hunters.
- ✓ Determine and set the structural Stop-Loss order before confirming the trade execution on your platform.
